## ABOUT ME

I am Babalola Oluwatobi Emmanuel a 24 year old software developer that is passionate about building web and mobile products that are not just beauty but also serves the every need of its intended users.

This passion has led me into User Experience Design a field which focuses on various ways and mechanism to help improve how the user feels while using a web or mobile product.

I am a technology enthusiastic person who believes in using science and technology to better the world around me and also play my part in making these technologies better.

## SKILLS
